

Illuminate **Your Future.** With **LAYER[®] Vault.**

Beyond Batteries, Beyond Boundaries.

The world's first low-light OPV energy harvesting and storage on a flexible film. Crafted with Organic Photovoltaic inkjet technology for unparalleled autonomy and sustainability.

The two-layered design captures ambient light for low-power needs and stores energy for high-power demands during low-light periods.

LAYER[®]Vault

The Most Sustainable and Cost-Effective Alternative to the Battery

Unlock unlimited, 100% natural energy supply & storage with LAYER[®]Vault.

Dracula Technologies introduces a groundbreaking solution, combining low-light energy harvesting and storage on a single flexible film.

Empowered by ambient light, LAYER[®]Vault provides complete energy autonomy to low-power electrical devices.

Say **goodbye** to rising battery costs and environmental concerns.

LAYER[®]Vault Benefits

- 01** Unlimited renewable energy
- 02** Reduced Total Cost of Ownership
- 03** Sustainable & non-toxic
- 04** Suited for ultra low-power devices
